

## The Eagle Point Solar Difference

Eagle Point Solar was founded in 2010 with an unwavering focus on quality, professionalism, and service. We have become one of the leading solar integrators in the Midwest with over 450 completed systems in Iowa, Illinois, and Wisconsin. We have provided solar solutions for a variety of customers and facilities including schools, city governments, farms, non-profits, large and small businesses and homeowners.

Here are a few things that make us uniquely qualified for your project:

- We are a locally owned, professional solar installer that is 100% focused on the solar industry. During the last 8 years we have grown to a team of 45 employees with specific areas of expertise in our industry.
- Full-time, on-staff installers. We do not sub-contract the installations of the solar array. We can leverage our knowledge from past projects and complete installations quickly, with consistent quality.
- Staff members that are certified by the North American Board of Certified Energy Practitioners (NABCEP).
- Named one of Solar Power World's top 500 solar contractors in the U.S. for 4 years in a row

### 2018 Wisconsin Solar Incentives

- 1) **Federal Tax Credit (30% of gross cost at installation)**
- 2) **Focus on Energy-Residential Incentive-12% of installed cost, not to exceed \$2,000\***
- 3) **Focus on Energy-Business Incentive-12% of installed cost, not to exceed \$4,000\***
- 4) **Modified Accelerated Cost Recovery System (MACRS Depreciation)**

\*Maximum incentive amounts based on system cost averages from the previous 12 months and will be updated every six months.  
NOTE: Work with a Focus on Energy Trade Ally to ensure the system installed qualifies for program incentives.

# Customer Testimonials

Eagle Point Solar is a great business with honest, caring people who go above and beyond to care for its customers.

Kate Reimann

Eagle Point Solar was a pleasure to work with throughout all phases of the project. I loved the "turnkey" aspect with them taking care of all permitting, rebates, etc.

William & Donna Menke

Eagle Point Solar did an excellent job installing our solar ground array. They were efficient, friendly and were able to answer our questions during and after installation. They worked with us to resolve permitting issues with the County and to get our project completed on time. They also did a great job taking care of the Focus on Energy application so we didn't have any worries on that account.

William Fannucchi

Very impressed with the installation crew. The ground was soft so they took extra time to put down plywood to run the heavy equipment over to prevent lawn damage. The panels look very nice. The crew kept us informed as they proceeded. Nice job!

Randy & Mary Weber

"The team at Eagle Point Solar did a great job throughout the entire process. It was a true turnkey project and ran with the utmost professionalism. The system works flawless and meets or exceeds the expected power output.

We looked at other companies as well and Eagle Point's honesty, expertise and price won hands down.

Very satisfied."

Mike Johns

We love our solar system. Not only is it saving us a lot of money but we are helping the environment as well. The back up batteries really make a difference. The Eagle Point team is a terrific group to work with. They were not only great on the install but also helping learn the system.

Gregg Hammann
