

How To Power Cycle Your Inverter

For systems built with SolarEdge inverters

Step 1

Move the toggle switch from **1** to **0** by moving the red switch right.

Step 2

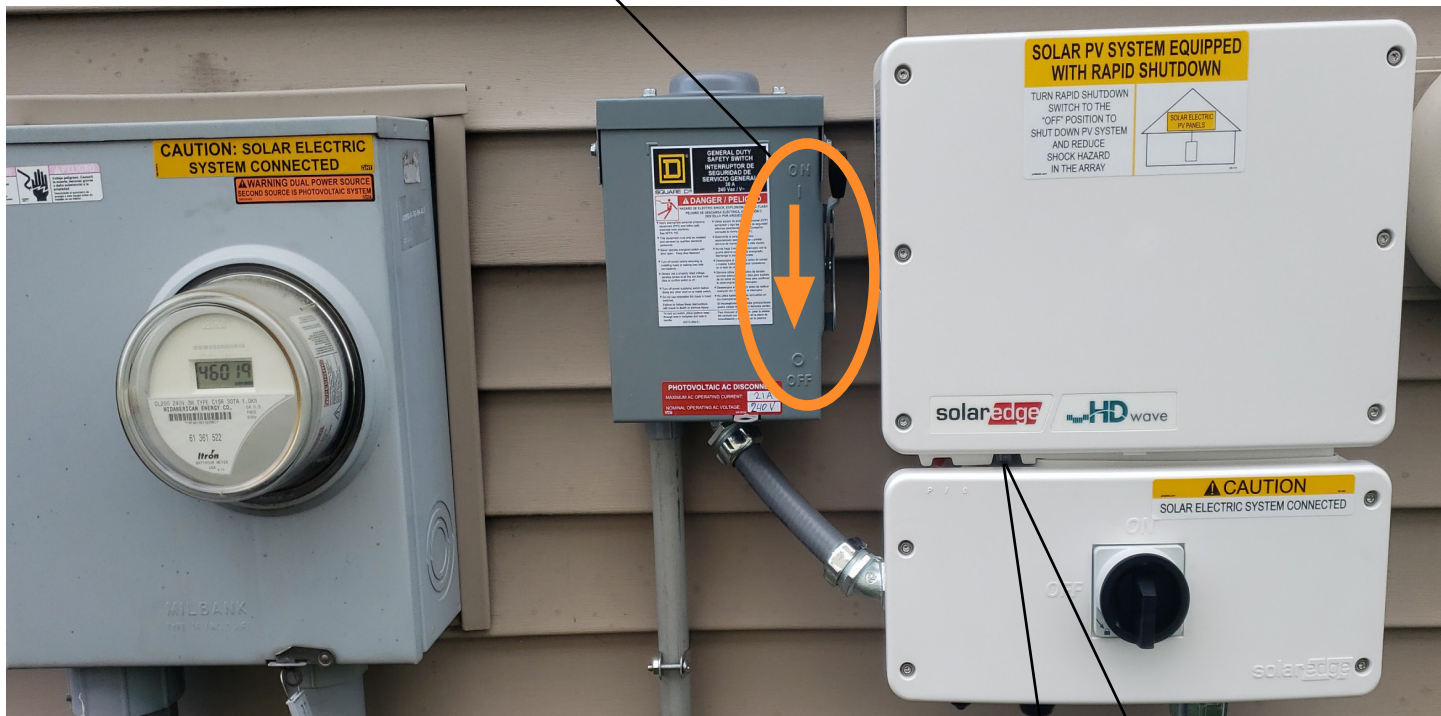

Move the DC switch from the **ON** upward position to the **OFF** position by turning the switch left.

Step 3

Move the AC Disconnect switch from **ON** to the **OFF** position.

Step 4

Turn each of the previous items on in reverse order.

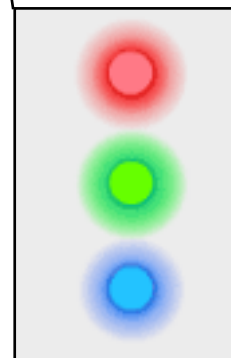

- #1 - Step 3: Turn the AC Disconnect **ON**
- #2 - Step 2: Turn the DC Switch **ON**
- #3 - Step 1: Move the toggle switch from **0** to **1**

Step 5

Verify the inverter **Green** and **Blue** lights are on.

Solid Green: System is producing.

Solid Blue: Inverter is communicating with the internet/monitoring platform.
